

I depend on XM radio to keep me informed of local information throughout the United States. I have friends and family in many cities and states throughout the country, and i travel frequently. I need the iformation provided by XM radio to keep me informed of local situations such as traffic and weather so that I may prepare for my trips adequately and confidently. I also depend on XM radio to keep me informed of conditions that might affect my friends and family. To deny XM radio or other similar services the ability to keep me informed of situations that are outside of my local area is not in my best interest, nor in the best interest of others that require quick and accurate information from other regions in the country.

Please deny the NAB request to limit my access to information. The technology that allows XM radio is also available to all the members of the NAB. If they would take advantage of it, it would improve their service.

Thank you.
